		Unit Team:	5

Comments

Inmate was seen today by psychology extern, Nicole Graham.

Inmate self-referred to psychology due to feelings of sadness regarding incarceration and distance from his support system. He explained when he was initially incarcerated he had close contact with his family and was keeping busy in the law library doing research for his case. However, he indicated his wife and mother-in-law have been less emotionally available as they are busy working to uphold financial responsibilities. Inmate also indicated his mother's cognitive decline due to dementia has become more pervasive and it is difficult for him to speak with her. He explained he was convicted at trial but his case is going to appeal. However, he has no knowledge as to when he will go to trial next and therefore has nothing to look forward to. Inmate noted experiencing feelings of sadness, ruminating thoughts, and difficulty sleeping.

Writer problem-solved with inmate about ways to remain active during the day and discussed cognitive-behavioral and mindfulness techniques to address insomnia. Inmate was receptive to these ideas and brought a sleep self-help book back to his cell. Inmate inquired about potential jobs he could get involved with. This writer informed inmate she would place him on self-help call out and inquire about work-related responsibilities for him. Inmate was in agreement with this plan.

Current Mental Status: Inmate was alert and oriented. He was polite, calm, and cooperative in demeanor. He exhibited a dysphoric mood with appropriate range of affect. Eye contact and hygiene were appropriate. He spoke with normal rate, tone, and volume. His thoughts were organized and coherent, with no loosening of associations or tangential, circumstantial, or irrelevant content. There was no evidence of perceptual disturbance, delusional ideation, or a formal thought disorder. He did not engage in any bizarre or inappropriate behavior. He expressed having difficulty sleeping and over-eating. Inmate denied recent and current suicidal ideation, planning, and intent. He was future-oriented and expressed a commitment to life and safety, agreeing to contact staff immediately should he experience suicidal ideation or psychological distress. He also denied thoughts of harming others.

Inmate EL GAMMAL was educated about both routine and emergency procedures for contacting Psychology staff. He does not appear to be in distress at this time. He agreed to contact psychology if he feels he needs psychology services in the future. He meets criteria for CC1 and does not require scheduled follow up at this time.

Encounter Date: 02/16/2016 10:32

Provider: Joaquin, Y. MLP

Unit: G07

Exam:**Exam Comments**

Inmate complaining of left lower back pain.

He is able to flex and extend his lower back with some pain.

No tenderness to the palpation. Refers that four years ago had a similar episode on his lower back. His wife used heat pads and felt better with it.

ASSESSMENT:

Backache, unspecified, 724.5 - Current, Temporary/Acute, Initial

PLAN:**New Medication Orders:**

Exam Comments

Patient comes to sick call with history of getting nasal congestion at night when he goes to bed. Refers no nasal congestion if he is walking around. This problem started like 10 days ago.

Patient refers that he was living in Arizona, and in New York for only 3 weeks.

Denies fever, nasal discharge or any bleeding from the nose.
